

BridgeDirect!

BridgeDirect is a fully automated onboard chart management system providing the user with:

- Weekly transmission of vessel specific digital Notices to Mariners, tracings, colour blocks and new edition data.
- Free of charge bespoke onboard software tailored to each vessel's chart index.
- Correction log and password system.
- Weekly transmission compressed to reduce costs.
- No special decoders or hardware required.
- User friendly.
- UKHO approved.
- MCA approved.
- Geographical or Numerical indexes.

INSTRUMENTAL IN MARINE NAVIGATION

- Charts can be corrected on a weekly basis. Vessel will receive current week's Notices to Mariners applicable to their onboard charts.
- Data is delivered by email.
- Compressed file sizes to reduce costs.
- Full password protected log allowing management and auditing of all corrections received and applied.
- Simple, quick access to all major functions.
- Tracings, blocks and corrections can be printed via folio, chart or for the whole onboard outfit.
- T+P indication and print.
- Charts can be organised as geographical or numerical folios to suit company operating procedures.
- Designed in collaboration with leading UK oil major.
- Unique chart purchase reporting facility.
- Simple installation on standard PC.
- Simple user interface requiring no formal training.
- Full reports menu.
- System ensures ship and shore records are synchronised.
- Fully integrated with chart management system.
- Developed by one of the world's leading international Admiralty Chart agents.
